EXPERIENCE

Full-time Full Stack Web Development Immersive
Xccelerate

04/2021 – 09/2021

Shadow
Many applications focus on connecting tutors and students but few focus on making the learning process more diverse and effective. Shadow simplifies the process of teaching students how to speak, listen and write second languages online. By providing set of tools, on the online language learning platform, like the flash cards, quiz cards and dictation cards. Not only tutors could prepare their own reusable learning materials, but also students can practice repeatedly anytime and anywhere. The project used React on the frontend, Bootstrap and module CSS for stylish and Node.JS, Knex.JS and Postgres for the backend in the project. The app used AWS S3 and Cloudfront for React app deploy and AWS EC2 Instance for backend deploy.

TravelApp
TravelApp let travellers explore Hong Kong like a local. The app used Node.JS, Knex.JS and Postgres for the backend and Bootstrap and Express-Handlebars on the frontend in the project. Travellers could search attractions information and use bookmarking system for trip planning. Each of them could also sharing their review in the journal. Manage travel and expense reports for department team members.
